What were we told about Iraq? NATO bombs would bring democracy and freedom. What were we told about Libya? NATO bombs would bring democracy and freedom. And Syria? – we were told that Western/Gulf Arab backed terrorists would bring democracy and freedom?

Who told us this – day in day out? Who disseminated information from only the 'opposition' forces? Who demonised the domestic governments in the countries targeted for Western backed regime change? The compromised corporate and establishment mainstream media.

Independent investigative journalist and peace activist Eva travelled to Syria 6 times since the conflict began. She spoke to those the regime change motivated media did not, she took footage, she redressed the lies that were regularly and shamelessly funnelled through our media and she spoke truth to power. **Eva Bartlett** – is a heroine of our time.

Come to hear and see Eva's first hand testimonies, photos and footage presented by Frome Stop War.
